· Physical state	Fluid
· Colour:	White
· Odour:	Characteristic
· Odour threshold:	Not determined.
• Melting point/freezing point:	Undetermined.
· Boiling point or initial boiling point and boiling	
range	100 °C
· Flammability	Not applicable.
• Lower and upper explosion limit	
· Lower:	Not determined.
· Upper:	Not determined.
· Flash point:	Not applicable.
Auto-ignition temperature:	Not applicable.
<ul> <li>Decomposition temperature:</li> </ul>	Not determined.
pH at 20 °C	ca. 3
Viscosity:	
Kinematic viscosity	Not determined.
· Dynamic at 20 °C:	ca. 12.000 mPas
	Brookfield ( <u>6 / 20 rpm)</u>
· Solubility · water:	Fullymianible
· Partition coefficient n-octanol/water (log value)	Fully miscible. Not determined.
· Vapour pressure at 20 °C:	23 hPa
· Density and/or relative density	2011 0
· Density at 20 °C:	ca. 1.1 g/cm³
· Relative density	Not determined.
· Vapour density	Not determined.
• 9.2. Other information	
· Appearance:	
· Form:	Fluid
· Important information on protection of health and	
environment, and on safety.	
· Ignition temperature:	Product is not selfigniting.
· Explosive properties:	Product does not present an explosion hazard.
Change in condition	
· Evaporation rate	Not determined.
· Information with regard to physical hazard classes	
· Explosives	Void
· Flammable gases	Void

see item 10.3

No further relevant information available.

- 10.2. Chemical stability Stable when stored and used properly.
- Thermal decomposition / conditions to be avoided: No decomposition if used according to specifications.
- 10.3. Possibility of hazardous reactions No dangerous reactions known.
- · 10.4. Conditions to avoid No further relevant information available.
- · 10.5. Incompatible materials: No further relevant information available.
- · 10.6. Hazardous decomposition products: Ethanoic acid

# **SECTION 11: Toxicological information**

- 11.1. Information on hazard classes as defined in Regulation (EC) No 1272/2008
- · Acute toxicity Based on available data, the classification criteria are not met.

· LD/LC<sub>50</sub> values relevant for classification:

## 108-32-7 propylene carbonate

Oral LD<sub>50</sub> 33,520 mg/kg (rat)

Dermal LD<sub>50</sub> >2,000 mg/kg (rabbit)

55965-84-9 a mixture of: 5-chloro-2-methyl-2 H -isothiazol-3-one [EC No 247-500-7] and 2-methyl-2 H isothiazol-3-one [EC No 220-239-6] (3:1)

Oral  $LD_{50}$  457 mg/kg (rat)

Dermal  $LD_{50}$  141 mg/kg (rabbit)

Inhalative LC<sub>50</sub> /4 h 0.33 mg/l (rat)

Skin corrosion/irritation Based on available data, the classification criteria are not met.

· Serious eye damage/irritation Based on available data, the classification criteria are not met.

· Respiratory or skin sensitisation

The use of preservatives in this product is necessary.

There are known cases of existing sensitization to these substances and allergic reactions may be possible in case of skin contact.

Based on available data, the classification criteria are not met.

- · Germ cell mutagenicity Based on available data, the classification criteria are not met.
- · Carcinogenicity Based on available data, the classification criteria are not met.
- · Reproductive toxicity Based on available data, the classification criteria are not met.
- · STOT-single exposure Based on available data, the classification criteria are not met.
- · STOT-repeated exposure Based on available data, the classification criteria are not met.
