## SECTION 7: Handling and storage

#### 7.1. Precautions for safe handling

Appropriate regular employee training.

Enclosure or extractor facilities are required.

Ensure good ventilation. This can be achieved by using a local exhaustion or general exhaust system. If these measures are insufficient to keep the vapour concentration below the workplace limit, wear an adequate respiratory protective device.

Not less than 3-5 air exchanges per hour

Wear protective gloves/protective clothing/eye protection/face protection/hearing protection.

Use only in well ventilated areas.

Perform spray applications in automated and closed systems

Use at room temperature

additional to professional application with multiple and/or significant contact

limit the exposure to 4 hours

Do not allow to reach ground water, water bodies or sewage system.

General protective and hygienic measures:

Avoid contact with the skin.

Keep good industrial hygiene.

- 7.2. Conditions for safe storage, including any incompatibilities
- · Storage:

• Requirements to be met by storerooms and receptacles: Keep container tightly closed.

- · Information about storage in one common storage facility: Observe the national regulations.
