SECTION 10: Stability and reactivity

· 10.1. Reactivity

see item 10.3

No further relevant information available.

· 10.2. Chemical stability

Stable when stored and used properly.

· Thermal decomposition / conditions to be avoided:

No decomposition if used according to specifications.

· 10.3. Possibility of hazardous reactions

No dangerous reactions known.

No further relevant information available.

· 10.5. Incompatible materials:

No further relevant information available.

· 10.6. Hazardous decomposition products:

Isocyanates

· Additional information:

When hotmelt adhesives are melted and applied, vapours are set free and an unpleasant odour can occur,

even if the recommended working temperature has been observed. Moreover if the prescribed working

temperature is exceeded over a longer period, harmful decomposition products can develop. Precautions

should be taken to eliminate the vapours, e.g. by using a suitable ventilation system.

Therefore measures for the elimination of the vapours have to be taken, e.g. by means of an appropriate

ventilation/ exhaust device.

· Note:

diphenylmethane-diisocyanate:

The test atmosphere generated in the animal study is not representative of workplace environments, how the

substance is placed on the market, and how it can reasonably be expected to be used. Therefore the test

result cannot be directly applied for the purpose of assessing hazard. Based on expert judgment and the

weight of the evidence, a modified classification for acute inhalation toxicity is justified.

May cause allergy or asthma symptoms or breathing difficulties if inhaled.

· Germ cell mutagenicity

Based on available data, the classification criteria are not met.

· Carcinogenicity

Based on available data, the classification criteria are not met.

· Reproductive toxicity

Based on available data, the classification criteria are not met.
